EREPLACEMENTS OFFERS APC-UPS COMPATIBLE BATTERIES TO CUSTOMERS

Press Release — July 10, 2013 — For Immediate Release

Grapevine, TX — eReplacements, LLC. has introduced a new compatible line of back up batteries as of July 1st 2013. The Premium Power SLA (Sealed Lead Acid) batteries are compatible with APC-UPS (Uninterruptible Power Supply) products. eReplacements offers compatible batteries for APC Back-UPS and APC Smart-UPS at exceptional prices. The models available now are SLA2-ER (RBC2), SLA4-ER (RBC4), SLA7-ER (RBC7), SLA11-ER (RBC11), SLA12-ER (RBC12), SLA17-ER (RBC17), SLA110-ER (RBC110).

“With over 20 million APC units sold we knew there was a market for these replacement batteries. APC-UPS are the most popular UPS’ in the world for servers, storage and network power protection. Trusted to protect critical data and equipment from power problems by supplying clean and reliable network-grade power. The compatible SLA batteries we offer versus the OEM SLA batteries will save our customers money and insure an uninterrupted power supply,” explains Tom Peck, President of eReplacements.

The eReplacements compatible UPS batteries are 100% compatible. All SLA batteries come with an 18 month warranty and will meet or exceed the original APC battery specifications because they are manufactured for high performance using the most up to date safety and engineering control standards. At eReplacements the quality and integrity of all products and their company is paramount. eReplacements has the credentials and certificates to demonstrate how they stand behind the safety and craftsmanship of all offered products as well as the ethical standards of their company.
